INCLUDES CERTIFICATE OF CALIBRATION

The RedBack Lasers CX510 is an auto levelling multi line laser level ideal for both indoor and outdoor applications. It features horizontal line and four vertical lines providing both vertical alignment and 90° site square layout capability. In addition the CX510 has plumb up ceiling cross and plumb down laser dot.

The CX510 is an extremely well made tool with cast metal internal chassis safety cage and rubberised housing.

The CX510 can be used indoors for visible lines or outdoors using the included LLR705 electronic receiver up to a range of 60m radius, big enough for most house blocks.

The CX510 is ideal for many trades from levelling and laying out the site to carpentry and fit out. The CX510 comes with mini tripod base, LLR705 receiver, Li-ion rechargeable battery pack, standard "AA" battery holder, target, glasses and tripod adaptor & Plate for all in a hard shell carry case.
