- Plumb Up Cross, Down Dot
- Ni-mh and "AA" Power
- Includes LLR721 ir 2 Way Receiver
- Certificate of Calibration
- 2 Year Warranty

INCLUDES CERTIFICATE OF CALIBRATION

The RedBack Lasers CX510SS is an auto levelling multi line laser level ideal for both indoor and outdoor applications. It features horizontal line and four vertical lines providing both vertical alignment and 90° site square layout capability. In addition the CX510SS has plumb up ceiling cross and plumb down laser dot.

Where the CX510SS differs from the CX510 is the ability to automatically set a site square. Simply set the plumb dot down over your datum, place the receiver at the other end of this datum line. Set the receiver to AUTO and the motorised base on the laser rotates the vertical lines until one is perfectly aligned with the receiver, the vertical line is now locked on along your datum line. Pick up the receiver and use it to locate the laser line at 90° to your datum line.

The CX510 comes with motorised tripod base, LLR721 receiver, Ni-mh rechargeable batteries, "AA" batteries for Base and receiver, standard "AA" battery holder, target, glasses and tripod adaptor & Plate all in a hard shell carry case.

SPECIFICATIONS
