INCLUDES CERTIFICATE OF CALIBRATION

The RedBack Lasers PL650 is an electronic auto levelling pipe grade laser designed especially for setting grades on pipes of all the most popular dimensions.

To set a grade on the PL650 simply enter the desired grade into the keypad as a percentage to 3 decimal places. The PL650 has a grading range between -20.000 to +40.000 % with auto dot centering (left to right) and remote control targeting were required.

The PL650 comes complete with a Ni-mh rechargeable battery pack plus a "D" cell battery compartment, keeping you working even if someone forgot to charge the Ni-mh battery. Also in the kit is a heavy duty target with two sizes of target plate and 5 sets of legs suitable for all the popular pipe sizes.

RedBack Lasers PL650 great features, great value.
