

UNG6701

Green 3 Dot Laser

Green 3 Dot Point Laser Instruction Manual

The UNG6701 is an auto levelling 3 dot green laser with a class 3r <5mW output. The laser produces an ultra bright plumb dot up and down, plus a horizontal level dot. The UNG6701 is ideal for all manner of internal fit out applications as well as visible outdoor work. The laser comes with a magnetic mounting base which also allows the laser to mount on to either a survey or camera style tripod if required. The laser is powered by 4x "AA" batteries.

Operation

First insert batteries in to the battery holder located in the battery compartment. The battery holder takes 4 "AA" batteries (preferably Alkaline) take care to insert in the correct direction as indicated. Insert the holder back into the battery compartment making sure the three round terminals are inserted first to contact the three internal springs in the battery compartment. Note you will need to remove the laser from the bracket to do this.

The UNG6701 can be operated with or without the mounting bracket. To power up the laser simply flick the locking switch to the on position. All three laser dots will illuminate at the same time.

www.redbacklasers.com.au

The UNG6701 has an out of level alarm which comprises of a loud beeping sound and the lasers flashing. This indicates the laser is outside of self levelling range. To get into range place the laser on a more level surface. Once in self leveling range the beeping and flashing will stop and the laser dots will be solid. The UNG6701 is auto levelling so as long as the unit is within self leveling range then the laser will accurately level, there is no need to make sure the surface the laser is on is perfectly level.

The laser can be adjusted on its mounting bracket so as to allow the plumb dot down laser to shine down. It can also be rotated on the bracket to help locate the plumb dot in the correct position. The bracket features strong magnets which allows attachment to any steel surface.

The UNG6701 is ideal for steel framework erection both inside and outside, range depending on ambient lighting conditions. The UNG6701 is also ideal for interior fit out, particularly, electrical installation downlights etc.

Specifications

Laser Output (H/V): Green Class 3r 500nm - 550nm <5mW

Accuracy: +/- 2mm/10m

Range: Visible up to 50m (Dependent on Ambient Light)

Warranty: 12 Months

Warranty Information – CMI Industries Pty Ltd
The Principles behind our warranty.

- Duration of warranty is fixed and automatic, when we advertise 1 year on a particular model, its two years. No drop down to a lesser time if you forget to register, registration is NOT required just proof of purchase showing date. Please check your specific model for duration of warranty, see the end of this document.
- Although the duration of our warranties are for a particular period it does not mean we will charge you for a genuine warranty failure a month or two outside that warranty period, we believe in a fair go.
- Even though a product shows signs of accidental damage, scratches and the like, we will not automatically fail the warranty claim, if the fault is NOT caused by a drop or misuse and is a genuine warranty failure then we will cover it.
- Our aim is to return repaired or replaced products as soon as possible as we know that being without your tool can be inconvenient. Our goal is a 72 hour turnaround (3 working days) after receiving it. Sometimes, however, a product with an intermittent fault may need extended testing to make sure we have made a full repair.
- Calibration is not covered by warranty much the same as the wheel balance on your car is not covered by warranty.

Now The Details and Legals

CMI Industries Pty Ltd provides consumers with a warranty to our products, this is in addition to the requirements of any relevant legislation such as the Competition and Consumer Act 2010.

Definitions:

"CMI", "We" or "Our" refers to CMI Industries Pty Ltd (ABN 29 102 713 922) of Unit 2 181-183 Thompson Rd, Bell Park, Victoria 3215 ph 1800 769 858
